ICANCash-Checks

The #1 Absolute Best Check Cashing Business System that fills all needs: Price, Security, Record Keeping, Verification and Guarantee.

WHO NEEDS ICANCash-Checks?

Any business that accepts or cashes checks or wants to: Supermarkets, Convenient Stores, Postal Centers, Gas Stations, Pawn Brokers, Travel Agencies, Jewelry Stores, Check Cashers, Payday Loan, Cellular Phone Stores, etc.

Scan fingerprint to determine if customer is registered in ICANCash-Checks database

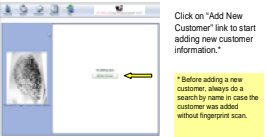

If there is a match, the customer's information, check cashing activity information and any "alert" messages will be displayed. If no match is found, then proceed to enroll the customer.

Let's do a transaction!

Scan fingerprint to see if customer is registered in the NCCD. If there is a match, you will see the customer's information, check cashing activity, and "alert messages", if any. If no match is found, then proceed to enroll the customer.

The ICANCash-Checks system will prompt you to add the customer to the system

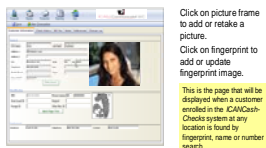

Click on "Add New Customer" link to start adding new customer information. * Before adding a new customer, always do a search by name. In case the customer was added without fingerprint scan.

Enter personal information and take digital photo

Enter customer's name, address and phone number. Take a photo of the customer and upload information to the customer's file.

The customer's new file will display

Click on picture frame to add or retake a picture. Click on fingerprint to add or update fingerprint image. This is the page that will be displayed when a customer enrolls in the ICANCash-Checks system at any location is based by fingerprint, name or number search.

The customer's new file will display.

Once they are enrolled, all your customer has to do is place their finger on the fingerprint sensor for you to access their records.

- * No cards to get lost and replace!
- * Driver's license not needed!
- * No identity switching!

Capture image of check

The ICANCash-Checks MICRImager instantly captures an image of the front and back of each check. This image is displayed whenever a check from this account is scanned into the system. This procedure also creates a file that can be transmitted directly to your checking account using our Check 21 deposit system.

Scan check

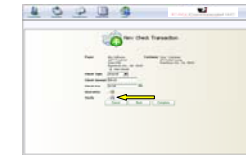

Follow the prompts to scan the front and back of each check.

View the last check image or the recorded check to ensure authenticity, and then click "Continue."

Verify the Check Casher

- Verify both U.S. and international customers
- Verifies and authenticates a customer's identity in seconds
- Verifies SSN and name match
- Verifies SSN was issued after date of birth
- Verifies name and address match
- Verifies phone and name match
- Verifies phone and address match
- Verifies name and date of birth and drivers license name match
- Checks whether customer address is high risk
- Checks whether customer is on a deceased list
- Screens name against Office of Foreign Asset Control (OFAC) list
- Can initiate interactive historical questionnaire to authenticate identity
- Provides up to 72 response codes in a customized format
- Complies with the Patriot Act

Verify the account

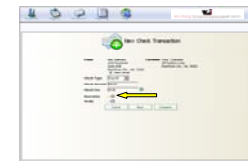

With ICANCash-Checks, you have the option to verify the check with our check verify feature. Click on the Verify Icon, and ICANCash-Checks will check the account against the only national bank account database to verify that the account is open with a positive balance.*

*Currently over 221 million accounts are in the system with more banks joining every week.

Verify: Check Casher, account and/or guarantee the check, if needed.

Select the type of check and the system will calculate commission automatically and tell you how much to give customer.

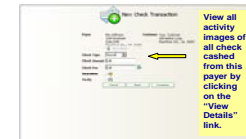

Guarantee the check

After the check is scanned into the system, you have the option to Guarantee the check. Click on the Guarantee Icon, and ICANCash-Checks will process check through the Guarantee System. If the check meets the requirements, the check will be guaranteed.

If a "guaranteed" check bounces, your account will be credited within 30 business days after the check is received by guarantor.

The payer information is displayed. Enter the amount of the check and calculate the fee

Use the drop-down menu to select the check type for fee calculation. Enter the amount of the check and click on the "Calculator" icon to calculate the fee. You can also Guarantee or Verify the check from this screen.

ICANCash-Checks lets you set unlimited fee schedules for six different check types by location.

The System prints receipt for the client.

ICANCash-Checks gives you an Iron-Gripped control of our check cashing business by providing you the information and reports you want and need, by time period, customer or payer.

Just click on the reporting link

Choose the report you want and click on the link.

The Check 21 Option allows your checks to be deposited, from your location to your bank via the Internet. No longer is it a necessity to go to the bank. Your funds are available in 24 hours.*

* varies with individual's bank.
